What is SmartOp?

SmartOp is an opportunities marketplace built using distributed ledger technology.

It is the first iteration of the Public Utility Connection Market within the Opolis Protocol.

Opolis is creating the future of decentralized employment where individuals have self-determined, portable employment along with unabated, frictionless access to opportunity.

Who is SmartOp for?

Candidates

(opportunity seekers)

Real & Verified Opportunities

No fake jobs; No phishing trips; Only *live* opportunities

Find your agent (not a recruiter)

Work with someone you know and have them find the best opportunity for you

Instantly apply

You've made enough resumes.
Simply provide 3 links and your SmartOp profile is complete

Agents

(fka recruiters)

Instant Payment

Backed up by distributed ledger technology, SmartOp verifies and distributes rewards

Guaranteed reward for quality candidates

Compete for candidates and get cash compensation for completed interviews, and hires

Make connections, be rewarded

[Get started](#)

Employers

Find talent faster

Incentivize the community to locate top candidates by offering verified rewards associated with open opportunities

Single platform

Keep track of your openings, locate top candidates and securely hold funds for rewards, all in one place

Choose your price

You determine what the service is worth. Allocate incentives to reward the community based on your needs. Only pay if you interview & hire.

Interested in signing up for an Employer account?

Send an email to smartop@opolis.co

make sure to include why your organization would be a great fit for SmartOp

First crypto friendly opportunities market

Powered by Ethereum

SmartOp is built on Ethereum, an advanced and powerful distributed ledger technology. Ethereum is censorship resistant, and inherently free from fraud or third-party interference. For more information on Ethereum, visit Ethereum.org

Payed for in DAI

Dai is a stablecoin built by [MakerDAO](#). It is stable to USD and reduces volatility risk typically found while using cryptocurrencies. It is the first decentralized stablecoin on the Ethereum blockchain

The future of distributed applications with SmartOp

uPort

uPort puts the individual back in control of their identity. uPort allows users to register their personal identity on the Ethereum blockchain, sign transactions, and securely manage keys and data. Download uPort from your mobile app store.

Metamask

Metamask is a Browser plugin that holds valuable crypto assets and provides an interface to send and receive cryptocurrencies as well as sign transactions, all from a secure vault directly in your browser. Download Metamask [here](#).
